

What can XHub do?

01 Directly Address User Pain Points

- Revenue Growth increased by **50%+**
- One-stop management** for devices such as solar, storage, EV charging and heat pump;
- Ripple control, DRM, §14a EnWG & §9 EEG compliance with regulations and real-time response;
- DIY condition selection and trigger actions to create personalized smart life scenarios

02 Installation Experience

- Easy installation: Rail-mounted installation, one-click Bluetooth network configuration
- Auto recognition: one-click scan, easy incorporation into management

03 Visualized Management (APP & WEB)

- 24/7 intelligent monitoring: AI updates the scheduling plan in real time based on dynamic tariff, weather, and other factors.
- Statistics & reports: Real-time update of AI-increased revenue, power generation and electricity consumption forecast data.
