

CONCRETE BASE – BIG

OHM/002/002

- **Perfect for any Ohmy mounting pole or the Smappee EV Base**
- **Made of reinforced concrete**
- **Firm installation due to the heavy weight of the base**

This base ensures quick and secure installation. Provided it is stabilised, the base can simply be placed on soft ground and is ready for installation of the EV charger in no time. Its heavy weight and reinforced concrete construction guarantee maximum stability.
