

BASE FOR SMAPPEE EV ONE

OHM/002/012

This base is used to mount a Smappee EV One device:

- When it needs to be installed on a hard surface.
- When work needs to be done quickly and waiting for quick-setting concrete takes too much time.
- When you do not want to work with the built-in base of the Smappee EV One.

This base can be installed in conjunction with the existing concrete pedestals from Ohmy to ensure a smooth, flawless installation.
