

FASHIONABLE COLLISION PROTECTION FOR FAST CHARGER – GREY

OHM/003/011/7021

- **Steel with dual coating: zinc layer + polyester powder coating against rust**
- **Ideal for protecting a charging station in accordance with regulations**
- **Stylish and efficient design**

The collision protection has a stylish design, but its thickness and height also make it very protective. It is high enough for the sensors of any car to detect the protection and thick enough to prevent damage to the charging station in the event of an accident. It is mounted in hard ground using six bolts (not supplied).
